

Dated: 18th Nov 2011

Post Plast India 2009, plastic industry continued to show consistent growth globally even during the most turbulent of times and also recent credit crisis, with domestic market for plastics in Asia demonstrating more resilience and growth. It is imperative to understand this market better

The Plast India Conference gives our fraternity a unique opportunity to debate for two days on the issues that are of our key importance & have clarity for near future. In this regard the conference is bringing to the audience the best of the experts who would enrich all with their vast experience regarding the market.

Here is a tentative list of the elite panel of speakers who would provide their insight into the latest trends. More to be updated
